

Dear Colleague,

The Society of Toxicologic Pathology is seeking to broaden its membership by reaching out to scientists and students (veterinary/residents/graduate) involved or interested in safety assessment, teaching, or research in toxicologic pathology/toxicology, and inviting them to join the STP and attend our 36<sup>th</sup> Annual Symposium on June 24-29, 2017. Our venue will be the Montréal Convention Centre/Palais des congrès de Montréal in Montréal, Quebec, Canada.

To help us reach scientists and students at your institution with a variety of backgrounds and research interests, we request you to kindly post our Annual Symposium (see below) in your departmental newsletter and/or continuing education section of your Website. Alternatively, please forward this information to the appropriate person or provide us with the contact information.

Please note that there are numerous travel awards available to students to attend the Annual Symposium in Montréal. Registration fees for STP student members will also be waived this year. Non-member students who apply by April 1 for STP student membership (\$30 annual dues) and are approved, can also register for free. In addition, nonmembers who apply for membership prior to June 30 and who are accepted will receive complimentary membership for the remainder of 2017. Please visit [www.toxpath.org](http://www.toxpath.org) to apply for membership.

#### **For the Web:**

##### **Society of Toxicologic Pathology— 36<sup>th</sup> Annual Symposium**

*Musculoskeletal System* is the theme of the Society of Toxicologic Pathology (STP) 36<sup>th</sup> Annual Symposium to be held June 24-29, 2017, at the Montréal Convention Centre/Palais des congrès de Montréal in Montréal, Quebec, Canada.

The aim of the 2017 symposium is to provide attendees with a broad exposure to the unique challenges of the musculoskeletal system in toxicologic pathology. For addition information, please visit the [Website](#).

Thank you very much.

Best regards,

STP Membership Committee
